

EYE PROTECTION

Eye protection must be worn by you where there is a risk of injury to the eyes.

Examples of work activities requiring eye protection are as follows:

- Working with any manual cutting tools
- The use of electrical woodworking equipment, including saws, grinders, sanders, planers, drill presses, etc.
- The use of an abrasive wheel.
- The handling of any chemicals – whether it's cleaning supplies or pool chemicals or paint.
- The use of compressed air to blow loose material, dust, or dirt from an area

- Drilling, cutting, or hammering
- Welding or brazing
- Handling, spraying, or brushing any chemical substance

In your own best interest, make sure you wear protective goggles or glasses when instructed to do so.

The eye protection that is provided must be suitable for you and must be replaced immediately, if lost or damaged. You must take care of the eye protection equipment.

REMEMBER YOU ARE ON YOUR LAST PAIR OF EYES!
